

Innovative Note Sorting Technology brought to you by **INFRES**

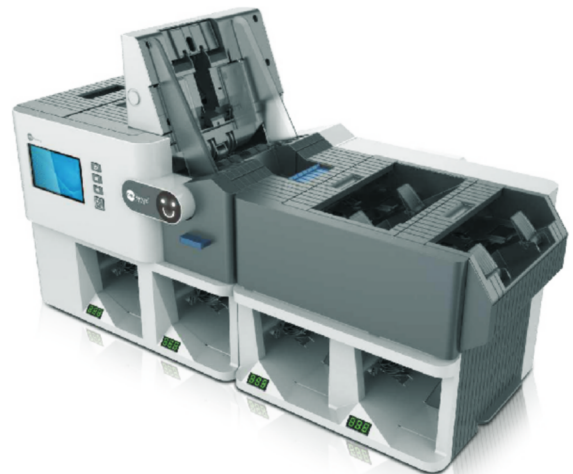

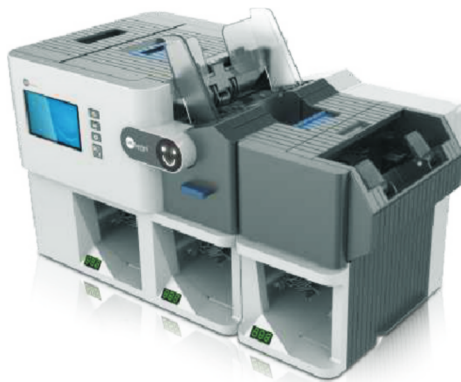

CM200VN/CM300N/CM400N

Compact Bank Note Sorting Machines

Incorporating latest technology for advanced counterfeit detection

Intelligent Bank Note Sorting Machine

❖ Reliable ❖ Secure ❖ Stable

More Compact

Reliable Quality & Durability

Faster Speed

Easier Maintenance

Enhanced Multi-currency

INFRES introduces latest bank note processing and sorting technology in India. CM 200VN, CM 300N, CM 400N are ideal cash sorting solutions for Banks, CIT's bullion markets and various retail segments like Jewellers, Hospitality, Hospitals, Automobile and other segments.

Equipped with a wide array of sensors such as IR, UV, magnetic, thickness detection and double CIS (Contact Image Sensor). CM 200VN, CM 300N, CM 400N are able to detect soiled, taped, stained, torn, dog ear, mutilated, sophisticated counterfeit bank notes

CM Compact Series Intelligent Banknote Sorting Machines

CM200VN, CM300N, CM400N, integrated with comprehensive hardware & software solution, require even smaller space to deliver their powerful functionalities. banks & CIT will benefit from their reliable cash handling service at a higher speed, that is 780-1,000pcs/min.

Precise Cash Processing

- Involve state-of-art identification and verification technologies to make new generation sorter more effective and efficient. Flexible sorting schemas makes it possible to achieve business requirement from bank branches in one sorting transaction

Optimum User Experience

- 4.3-inch touch screen and interactive operation make the interaction more convenient and instinctive
- Innovative compact design generates more stable, smaller, lighter new devices
- Multi communication interfaces make it easy to extend external devices, such as LCD, printer, etc.
- Two reject stackers distinguish reject notes from counterfeits (only for CM400N)
- Brand-new noisy control technology

effectively decreases the noise

- A shining smile lights up your mood

Sorting Report Management

- Support integrating with backstage management/surveillance system to track sorting record & to trace each banknote to realize centralized management
- Customer could check sorting report on machine or export them to external devices like flash disk, other storage device as well for further analysis
- Connect with printer for instant sorting report printing (configurable)
- Recognize and store OCR in sorting record (optional)

Convenient Maintenance

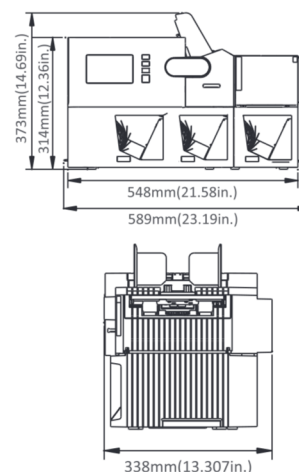

- Ergonomics design, horizontal stacker in favor of users' operation
- Users have full access to banknote transport to remove jammed notes and conduct cleaning
- Support remote updating and diagnosis (optional, cooperated with management system)
